

Inigo Update

Nov 09

New Cisco Telephone System

Blackwell House, City of London, is the next centre in Inigo's portfolio to benefit from the Cisco VoIP telephone system already impressing clients at 1 Queen's Square, Bath. The Cisco Unified IP phones are strong

reliable comfortable phones with high-fidelity wideband audio and large backlit colour displays. The phones use the same data network as clients' computers, which means less cabling in the office. The online management makes it really simple to add speed dials or forward calls remotely. We are also please to announce that we can now offer FSA compliant call recording.
